Workshop in Shargole Block

An interactive workshop was conducted with Community Health Workers (CHWs), including Auxiliary Nurse & Midwives, Community Health Officers, Block Monitoring & Evaluation Officer, and Data Entry Operators of the Shargole Block. The workshop primarily focused on enhancing the understanding and skills of CHWs in creating ABHA from various interfaces, resolving multiple technical issues, and linking health records across different programs. Following the training, a WhatsApp support group was established for the trainees, with the aim of providing continuous assistance in resolving procedural issues encountered during the creation and linkage of ABHA IDs. Over 25 professionals were trained.

Outreach Camp at Health Mela

The ABDM team conducted an outreach camp at a health mela held at the Community Hall in Skara village. The audience consisted of community members from Skara and health professionals participating in the event. More than 40 ABHAs were created, and awareness about ABDM and ABHA was given to the participants.

What is Digital Health Incentive Scheme?

Digital Health Incentive Scheme was launched by National Health Authority in the beginning of 2023 with the aim to boost the adoption of ABDM and increase digital health transactions in the country. This initiative provides the right encouragement to majority of the health care providers for adopting digital health and also to digital health solutions to make available the right software at an affordable cost.

Benefits will be provided to the health facilities only for transactions done by them above the base level transaction set by NHA.

District Hospital Kargil and S.N.M Hospital Leh are receiving and leveraging the benefits from Digital Health Incentive Scheme.

More about Digital Health Incentive Scheme

Benefits of DHIS:

- Earn incentives for digitization
- efficiency in healthcare delivery
- Building a robust digital health ecosystem
- Improved quality of care

Eligible criteria for DHIS:
